

Integration of CI/CD

How to create revenue and reduce costs

Problem

Our processes leads to more costs and worktime

- We lose time in deployment process
 - We're doing most of the tests manually
 - Most of the team members do not know how the deployment process works
-
- Due to the process, we have more human errors and the deployments takes a long time
 - We spend to much time in debugging and testing the production wich leads to unhappy customers

Solution

Automation to the rescue

- Less human error, Faster deployments
Avoid costs
- New value-generating features released more quickly
Increase revenue
- Reduced downtime from a deploy-related crash or major bug
Protect revenue
- Prevent embarrassing or costly security holes
Avoid costs

Summary

Automated Pipeline process

- Create infrastructure
- Deploy Production
- Testing
- Rollbacks
- Promoting

Push new features

CI

CD

New Features ready

- Automated tests
- Verify security
- Merge features
